

Browser Use alone: scrolls down 14 times and runs out of steps (task failed)

Start page

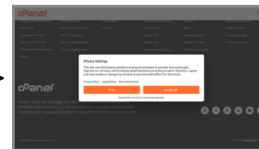

Step 1: scroll down

Step 2: scroll down

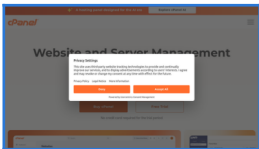

Steps 3-7: scroll down

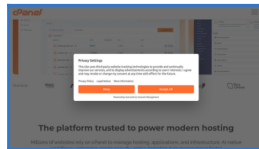

Step 14: scroll down
end of page, budget used up

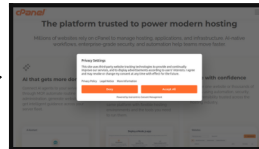

Browser Use + Ours: failure detected at step 2, recovery option taken, task completed (scored after step 4)

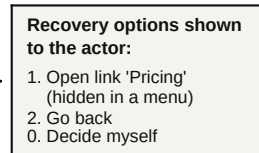

Start page

Step 1: scroll down
 $P(\text{failure}) = 0.04$

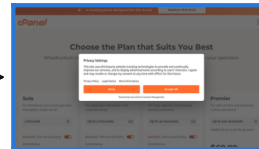

Step 2: scroll down
 $P(\text{failure}) = 0.98 \geq 0.9$

Recovery options shown to the actor:

1. Open link 'Pricing' (hidden in a menu)
2. Go back
0. Decide myself

Actor answers "1";
Browser Use navigates

Step 3: navigate to Pricing
(target page reached)
